

Intro to Permaculture Week 3 Overview Video Transcript

Music

Hello and welcome to week 3 of the Intro to Permaculture massive open online course. Let's do a little bit of a check in about where we are thus far in the course. So week 1 we looked at the definition of permaculture, we looked at design process, we looked at the scales at which we find permaculture systems. Week 2 we looked at reading the landscape and creating a sight analysis, and now here we are in week 3 where we're going to dive into design. We're going to look at permaculture design principles, permaculture design methodologies, and we're going to look at the scales of landscape permanence, another tool to help us with the process and protocol of permaculture design. And here's our quote from Bill Mollison: "Though the problems of the world are increasingly complex, the solutions remain embarrassingly simple." So I'm looking forward to diving in here to permaculture design week 3, and I'll see you there.
